SCOOTAMATIC LTD:

Sole Concessionaires in the U.K. for the famous VAP Engine and spares

MOPED

Sensational newcomer!
 WITH AUTOMATIC CLUTCH
 and single-grip control

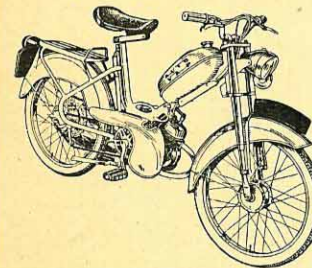

Takes you there without changing gear

RIDING THE **AUTO-VAP** IS
 SIMPLICITY ITSELF!

Easy starting avoids the irritating things that go with the riding of an ordinary moped. *With its single twist-grip control, no gear changing is necessary. It has automatic progressive clutch—no declutching.* There's also automatic choke control. This is the only moped with the fabulous "Magneclair" high-efficiency lighting and ignition equipment. Its brakes are super-dependable in full-width, light-alloy hubs. It has deep valance mud guards for full weather protection and long-reach telescopic forks. The AUTO-VAP is the world's finest moped.
