

The Bicycle
21 September 1937

Races in the John Bull home trainer will again be featured.

BATES BROS. 18

RANGE of this firm's 1938 hand-built lightweights includes Volante six-day, pace-following, and cement-track machines, £14 6s. 6d.; B.A.R., for long and short distance time-trials, £15 4s. 6d.; Utopian, specially suitable for short-distance events, £12 2s. 6d.; Vegrandis super dual-purpose model, racing or club riding, £10 4s. 6d.; Ideal, a reasonably-priced club machine with good specification, £8 7s. 6d.

All machines, except New Club, incorporate the famous Cantiflex patented duo-taper 531 tubes and Diadrant registered forks, the advantages of which need little explanation nowadays.

In addition to lightweight bicycles, great interest will be centred around a new Continental spring frame, something entirely different, imported from the Continent and handled solely in England by Bates Bros. A new type of sprint rim makes its debut in this country. It has been used with numerous successes on the Continent, and is known as the "Sieber Star Rim," and is made in Switzerland. It is a hollow aluminium rim with a beechwood bed to ensure perfect adherence of tubulars, etc. 35s. a pair.

A number of well-known racing men will be in attendance, among whom are Stan Butler, Cyril Heppleston, George Ely, and Len Thorpe.
