IceniCAM Information Service

stand report.

BOWN CYCLE CO., LTD. 68

BOWN'S have some surprises up their sleeves, details of which they are withholding until the Show opens. In addition to these models the full range of high-class sports cycles will be shown, and the tourist has not been forgotten in this exhibit. The Continental model has been retained, but there have been several improvements in the specification. Change-speed gear models are, of course, also included on this stand, and popular roadster bicycles will be shown for the utility rider.
