

**The greatest little motor
cycle in the world!**

The Corgi Lightweight Motor Cycle is a cheaper—and more convenient—form of personal transportation than most public transport services. Powered by the famous Spryt 98 c.c., 2-stroke engine, it is a real glutton for work; yet it is the simplest motor cycle to handle. The handlebars and saddle can be lowered so that the overall dimensions of the machine are only 53 ins. × 20 ins. × 13 ins.
