NOVEMBER 12, 1952

Constrictor Tyre Co., Ltd.

OFFERING the discriminating cyclist a complete range of quality components backed by 50 years' experience, the Constrictor Tyre Company will be displaying several new lines as well as a full range of "old faithfuls."

Their most recent additions are the non-blister inner-tube and a rubber "honking" grip for hooded brake levers.

Grass-track racing enthusiasts will interest themselves in the 13-oz. De Luxe Zone tubular. It has been specially treaded to meet the needs and conditions under which it is used. The price of each tubular is £3 and its quality unmatched.

The price tag on the Osgear Professional will be showing new figures next season—prices will be marked down. Clubmen will welcome this reduction. They will also welcome the news that the Osgear will not suffer in quality because of this price change.

Asp, Boaloy, Mamba and Sprint rims; pedals, toeclips, hubs and many other vital accessories, essential to a good bicycle, will be on view, and visitors are particularly invited to inspect Constrictor's hand-made tyres, which are another of their fine products.

Nursery Lane Works, Forest Gate, London.
