

Special **CYC · AUTO** Model S.1

Complete with chassis attached to machine by a quickly detachable draw pin, allowing free up-and-down movement. Owing to the ease with which it can be detached—a few seconds only are required—it is not necessary to remove the body. No tools of any description are required, although absolute safety is ensured.

The castor type wheel ensures that tyre wear is reduced to a minimum, allows for free and easy turning in a small radius, and practically does away with all side pull. A damper is fitted which is readily adjustable to take up any excessive movement of the castor wheel over very bad roads.

Chassis is of tubular steel construction, of ample strength.

Complete with 14" × 2" wheel and tyre.
