The New "Vero" Chain Cover has proved a success beyond all expectations, and once again we have hit the popular taste with a high grade article at a moderate price. Agents who have not already seen it should apply at once for illustrations and particulars.

The actual orders booked at the Stanley Show, and the enthusiasm with which the Trade received the New Dover Guaranteed Exonite Inflator, is a proof that we have met a long-felt want. "The Pump that Pumps" is British Made throughout, and is destined to effectually sweep out the rubbishy foreign made celluloid inflators which have caused such dissatisfaction in the Trade.
