DUNLOP

CAPITALISING the jubilee of the invention of the pneumatic tyre, the Dunlop Company has recently introduced a new cycle tyre known as the Jubilee, a tyre at a medium price for which there is bound to be a big demand owing to the manner in which it links up with the Dunlop jubilee celebrations.

The Dunlop range generally is so well known to the trade that little

Two tyres from the Dunlop range—the recently introduced Jubilee and the popular Fort cover

comment is needed, but special reference may be made to the High-pressure Road Racing pattern, which is designed for use only with special lightweight Endrick rims, and provides a popular combination for racing and lightweight enthusiasts. The Sprite is another pattern which has gained a well-deserved reputation among keen riders, while in the roadster range the famous "Fort" appeals wherever maximum service, security and trouble-free running are the primary considerations.

Just as the Dunlop cycle tyre range covers every possible demand, so does the selection of motor cycle tyres. The list of types and prices given below clearly indicates the wide choice available.

CYCLE TYRES.
