Cycling to Success

It is now almost a hundred years since the first Elswick Hopper cycle appeared on the roads of Britain. From the first, we were determined to build a reputation for quality, reliability and finish – and the success we have enjoyed since 1880 has more than justified our decision to place craftsmanship at the head of our priorities.

Today, our reputation has never stood higher, and the popularity of our models is reflected in the wide range of cycles we produce in our factories in Great Britain.

We make cycles for children, commuters, housewives, tourists and sports enthusiasts. We believe in giving cyclists the mounts they need.

And this is why, wherever there are roads you'll find Elswick Hopper cycles. Giving the service and performance that has always been expected of them . . . the products of expert British craftsmen and designers who are proud of their profession – and of the reputation of Elswick Hopper.

Guarantee

All Elswick Hopper cycles are guaranteed against defective materials and workmanship for twelve months from date of purchase. Our long established reputation for quality and finish is backed up by a network of cycle specialist retailers who are able to advise on your choice of cycle and look after your servicing needs.

Our policy is one of continuous development and improvement. In our customers' interests we therefore reserve the right to alter specifications without prior notice.
