

Michelin Cycle Tyres

The biggest range in Britain

The Michelin Range of Cycle Tyres

Great British tyres from the only cycle tyre manufacturer in Britain

As Britain's only cycle tyre manufacturer, Michelin offer a range of tyres and tubes that is the widest on the market. The outstanding feature of each tyre is its quality, plus our belief that the more we put into a tyre, the more a cyclist gets out – in terms of everyday, all-round performance.

Sports & Lightweight Bikes

BIB-TS

At around 8½ ozs. this is the lightest and fastest of the Michelin range. It is unquestionably a high performance tyre with its narrow section, low rolling resistance and superb all-weather grip.

BIB SPORTS 25

A conventionally built, very resilient lightweight. Weighs 13½ ozs. and depending upon rider weight and usage can be run at a maximum pressure of 90 p.s.i.

CL

A touring tyre for junior and adult bikes. With its chevron pattern and centre ribs it's been built to stand the pace.

SPEED

A lively high pressure touring tyre giving exceptionally good grip.

ELAN

Another Michelin narrow section, performance lightweight. Maximum pressure: 100 p.s.i.

CLUB TOURIST

Has all the grip and staying power that you would expect from a great touring tyre. Maximum pressure: 95 p.s.i.

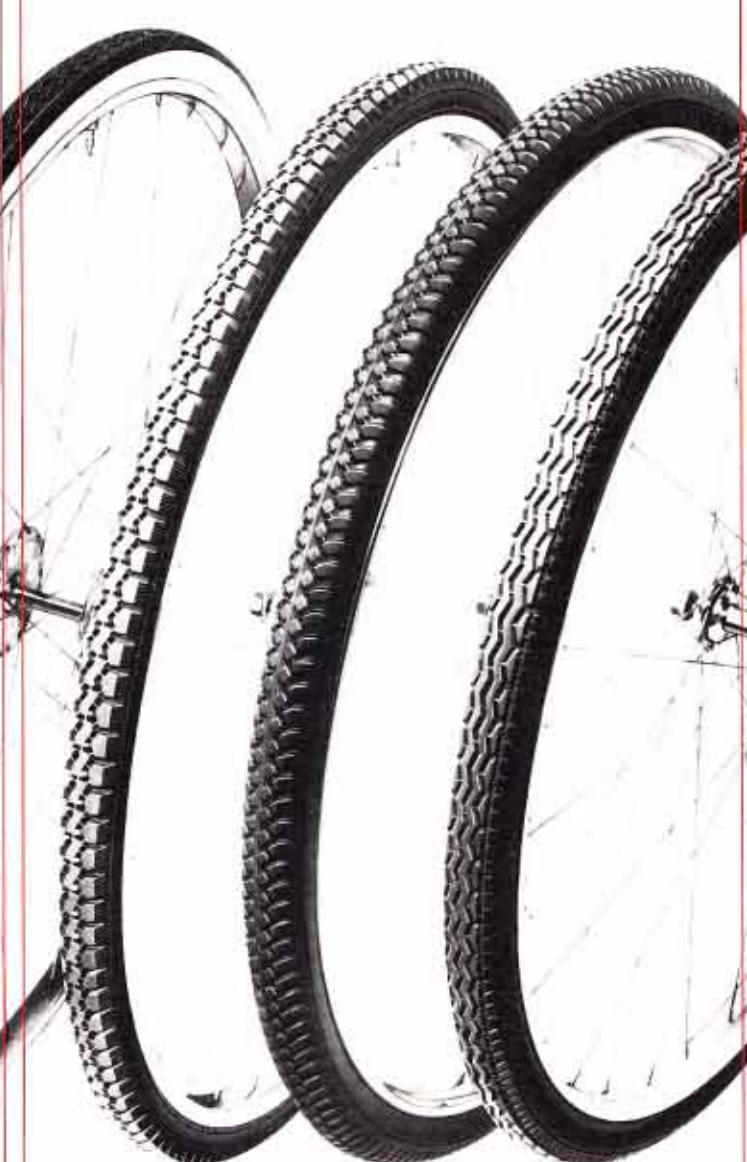

CHEVRON

Stylish, lively and very popular with the clubman.

SPORTS

A popular, low-priced, strong all-rounder.

'Roadster' Cycles

ROADSTER

A top tyre of lasting quality which gives a comfortable ride.

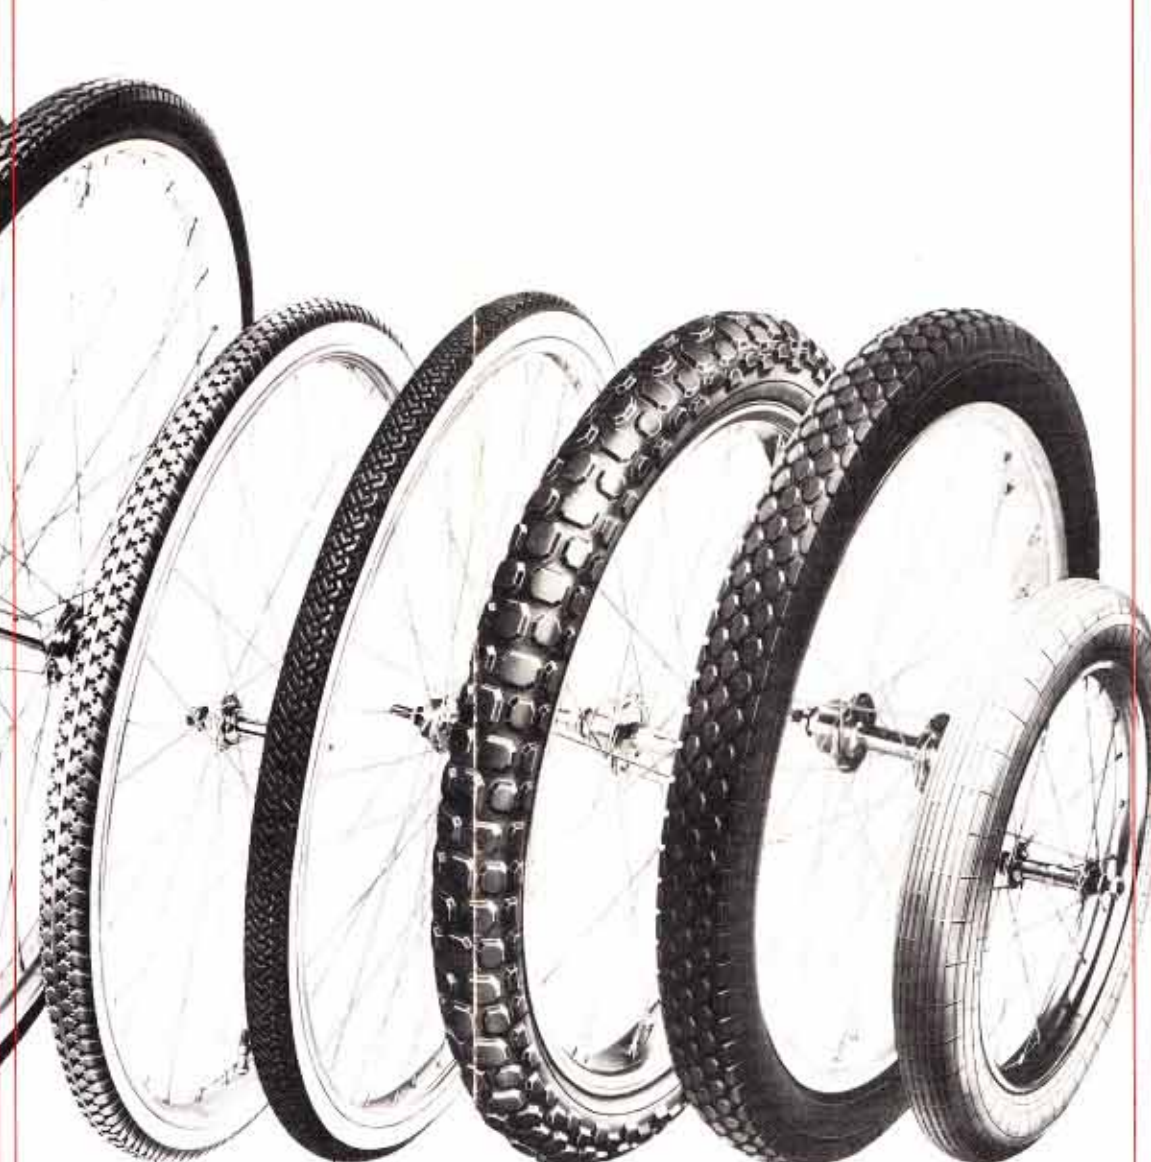

ZIG-ZAG

A popular general purpose tyre at a popular price.

ENDURANCE

Just like its name suggests: strong and durable with a tread that's built to last.

Junior and Small Wheel Cycles

UNIVERSAL

A safe and durable all-purpose tyre.

BIB CROSS

A tough, resilient tyre specially built for the ruggedly ridden 3MX-type bike.

GT

For junior and certain small-wheeled adult machines. Resilient and reliable.

TB

A tough durable tyre designed to withstand the 'pedal-power' of even the toughest young tearaway.

RIBBED BALLOON

A ribbed tyre suitable for junior and small-wheeled adult cycles.

Cyclo-Cross Delivery Bikes

BIB TS CROSS

A narrow section, fold-up lightweight. Designed for croquet rims, its big advantage over its tubular rival is that it can be repaired much easier, i.e. just like a conventional tyre. Maximum pressure: 95 p.s.i.

CARRIER

A heavy duty tyre for tradesmen's delivery cycles.

The Easy-to-carry Bib-TS. It folds flat and packs into a plastic envelope together with fitting instructions and a tyre lever specially designed for removing tyres with flexible bead cores.

Michelin Tubes

With Michelin tyres you should always use Michelin tubes. Moulded in butyl they hold the air longer and are fitted with high quality valves. There is a Michelin tube with a Presta, Woods or Schrader type valve for all requirements. Michelin tubes are available for all Michelin tyres.
