...the exhibit.

LA MOTOSACOCHE (H. & A. DUFAUX (ENGLAND), LTD., HOLBORN VIADUCT, E.C. (95)

La Motosacoché means practically "a motor in a tool-bag." This is not literally correct, but the engine, tank, carburetor, and all other appurtenances are in a triangular-shaped tube framework, and are enclosed in side-plates, with a funnel-shaped aperture in front to catch the air for cooling purposes. The whole arrangement for making an ordinary cycle into a motor cycle is ingenious, and fits into the triangular space between head and seat tube. It is beautifully finished, and light in weight. It is the latest development of the light-weight motor bicycle, and as such is to be welcomed. The engine is 1½-h.p. The whole arrangement is 35lb., and the complete cycle fitted up is about 70lb.

MINERVA MOTORS, LTD., 40, HOLBORN VIADUCT, E.C. (148)

This firm make a good display of their motor cycles in both the single and double cylinder models, but there are no striking departures from last year's patterns to be chronicled. Models now include a 2½-h.p. and a 3-h.p. single cylinder
