HERE is a substantial and remunerative business to be obtained through the medium of "Kiddies" cycles. The demand for this type of machine is growing steadily year by year, and provides an excellent substitute line during the Winter months.

An economical method of supplying these machines is provided by the use of Phillips "Kiddies" frame sets, fitted up complete with handlebars, brakes and pedals, and enabling the completion of the bicycle to be effected with a minimum of assembly work, well within the scope of every enterprising cycle trader, however limited his capacity may be.

Phillips "Kiddies" frame sets are designed and constructed with exactly the same meticulous care and attention to detail for which Phillips roadster and sports frames are renowned the World over.

Illustrations and brief details are given overleaf and we shall be pleased to quote against your requirements and submit any further particulars that you may desire, immediately upon receipt of your request.
