PHILLIPS

MOTORISED BICYCLE

BICYCLE SPECIFICATION.

- FRAME.** 22" with curved top tube dropping to 20". Built from heavy gauge tubing. Front fork heavy duty pattern with malleable crown and 16 gauge fork blades fitted with liners and girder fork attachment for maximum support.
- WHEELS.** Front—26" x 1 3/4" with Phillips' Hub Brake, cable control, and 13 gauge spokes. Rear—26" x 1 3/4" with Coaster Hub Brake and 13 gauge spokes. Front and Rear Wheels are fitted with 26" x 1 3/4" Dunlop Carrier tyres with Schrader valves.
- HANDLEBAR.** Allrounder 23" wide.
- PEDALS.** Phillips' moulded rubber 4" with extended end plates.
- SADDLE.** Large spring seat with C.P. springs.
- MUDGUARDS.** Heavy gauge extra wide with double stays.
- CHAINGUARD.** Robust half section.
- FINISH.** Frame Silver Grey enamelled, lined single red on "Bonderized" rust proof surface. All bright parts chromium plated.
- EQUIPMENT.** Number Plates, Licence Holder, Front and Rear Lamps, Kickstand, Metal Pump, Toolbag and Tools.
- EXTRAS.** Supplied to order only. Electric Horn, Speedometer.

CYCLE-MOTOR SPECIFICATION.

- ENGINE.** 49 c.c. two stroke with a stroke and bore of 38.25 x 40.5 m.m.; incorporates an aluminium alloy cylinder barrel with cast liner and a detachable aluminium alloy cylinder head to facilitate easy decarbonisation.
- IGNITION AND LIGHTING.** By Bosch Rotary Magneto, incorporating a 6 volt/6 watt lighting circuit, complete with front and rear lamps.
- TRANSMISSION.** By 1/2" x 3/16" Carrier chain to independent sprocket on rear wheel and incorporating special chain tensioning device.
- CLUTCH.** Advanced design dry multi-plate type, which ensures easy and delicate take-up with positive drive. Two stage trigger stops on lever to ensure freedom from drag when engine is disengaged.
- CARBURETTOR.** Gives fuel consumption of approximately 180-200 m.p.g. and has special "rich mixture" device for easy starting. An important feature of this device is that it is self-cancelling from the throttle twist grip without dismounting or removing either hand from the bar.
- FUEL AND LUBRICATION.** It is important to observe the correct mixture of 25 parts petrol to 1 part of oil.
- PETROL TANK.** Capacity approximately 1/2 gallon. Has the unusual advantage of being fitted with two-way tap for switching on to a reserve supply in case of emergency.
