INSTRUCTIONS FOR ORDERING

It is essential that the following information is provided with each order for spare parts:—

1. Type and model of the machine.
2. Frame and engine numbers.
3. Part number, e.g., MTA 123, description and quantity of each spare part required.

Failure to provide this necessary information will inevitably lead to delay in fulfilling the order.

DEALERS PLEASE NOTE

SELLING UNIT

Spare parts orders are now processed and invoiced by computer, and all items are classified by 'selling unit'.

There can be no departure from the selling units employed, and if you will quote the correct selling unit on all your orders the possibility of quantity errors will be greatly diminished.

Example:—For selling unit 'Dozen'.

1. It is not possible to order a quantity of *less* than one dozen.
2. If you require one dozen, please do not order '12'. Otherwise you will receive '12 dozen'.

We are using a computer to enable us to give a more efficient service. Please help us to use it properly in your own interest.

Every effort is made to ensure that spare parts are readily available in all areas.

Members of the public should note that should any part not be immediately available from your local dealer, he will be pleased to order the parts for you. It is not our normal practice to supply spare parts direct to the public.

NOTE:—We reserve the right to alter or vary the specification of parts herein listed without prior notice.

The terms issued from time to time by our Motorised Division and the Conditions of Sale in our Guarantee apply.
