

## MOTOR CYCLE MATTERS

by Francis Jones

### Reynolds moped set

Then Reynolds Tube has developed a moped frame set that impressed me as having very great promise. Even though it has rear springing, the price will apparently be quite reasonable, and it should be a very attractive proposition to any concern

### Motor Cycle Matters—Continued

wishing to enter the market with a machine of this type. It is a pity, though, that no British proprietary engine is available, in about the 50 c.c. size. Or could it be that the Prestwich firm has got something up its sleeve? If so, I should not be surprised.

OSCILLATING MOPED on the Reynolds' stand was the frame, tank, mudguard and chainguard set which the company is offering to assemblers.
