No gears — no clutch — no throttle
One year's guarantee

Goes on and on
and on for everyone.

Sportsmen, Teachers,
People on the ball
— accessibility.

Air hostesses, everyone
— the great get away
and get back again bike.

Businessmen, Brokers,
Citizens bank on it — ease of
commuting and economy.

a SOLEX is a SOLEX is a SOLEX is a

The universal appeal of the Solex is simplicity. Built to the right formula in 1946. Still the same machine. No gimmicks. No de luxe version. No special models. Just 6,000,000 satisfied customers, all over the world.

SOLEX SIMPLICITY

The Solex is really two bikes in one. Push-bike simplicity with tough 49 c.c. motor effectiveness. Same controls as a push-bike. No gears — no clutch — no throttle. Friction drive to front tyres through automatic centrifugal clutch. Needs no adjustment. Front brake lever controls throttle. When brake is applied, clutch disengages — machine stops. If you like exercise — pedal, as simple as a push-bike. The engine is disengaged with the flick of a lever.

THRIFTY FIFTY

Magnificent fuel consumption of 200 mpg means 3 miles per 1d. even at today's prices.

Lowest priced motorised cycle in the country —
