Andy's of Beckenham

MESSRS. ANDY'S, of 9, Rectory-road, Beckenham, Kent, have produced a neat ten-page catalogue of their 1938 productions, and this, containing as it does illustrations and detailed specifications of some half-dozen club and racing machines, will be found of very considerable interest by keen club riders. The first machine in this catalogue is of an unusual type, being known as the "Rough Rider," a very strongly built machine for hard usage "off the beaten track," and an ideal mount for the extra vigorous type of club run or for a typical "rough stuff" event. The price of this useful machine is £7 9s. 6d., or with Sturmey-Archer A. R. three-speed gear or Cyclo gear, it costs £8 19s. 6d.

Other clubmen's machines illustrated are the "Clublite," at £7 7s. and the "Super-Club," at £8 8s.

There are also two Continental type models, the "Continental," a high-class modern mount, selling at £9 9s.; and "La France," the specialist's job, at £12 12s.

Although this catalogue gives details of machines and frames, it should also be remembered that Messrs. Andy's specialise in all kinds of cyclists' equipment, including tights, track shorts, shoes, etc., and they have just stocked up for the season with a tremendous assortment of materials for the club-ite.
