Now everyone can enjoy the pleasure of cycling thanks to MBK. From 5 years to 95 years, there's a bike for you. Superbly engineered with safety, comfort, style and quality in mind.

MBK

IN TUNE  WITH THE
ENVIRONMENT

**Mountain.
ATB Style**

RANGER HI-TECH 21

The Ranger. Your ticket to freedom. Reliable-Inspiring-Competitive.

MBK has always believed in research and technical innovation to achieve the optimum balance between performance and reliability. Now MBK have done it again, a revolution, the "High Power Frame."

The "High Power Frame," "HPF" for short, is the symbol for a new generation of bicycles through its performance, rigidity and reliability.

The "HPF," or frame with oriented ellipses, was until now reserved for custom made and top of the range bikes only. Now, MBK's technical expertise brings it to the production line.

Frame: 8 tubes Cro-Moly 'H.P.F.'
Re-inforced head/down tube joint.
Lugless. Vertical dropouts. **Fork:** 'H.P.F.'
Cro-Moly Unicrown. Oversized blades.
600mm Radius Bend. **Group:** 'Shimano'
DEORE LX S.T.I. **Wheels:** 'Mavic' 26"
Anodised Rims. Q.R. Hubs. Stainless
Spokes. **Components:** Cro-Moly Stem.
Micro-adjust Seat Post. Oversize Headset
featuring Special Alloy Cable Hanger.
Colour: Metallic Light Grey.

Mountain

ADVENTURE 21

Take to the hills on the fabulous His'n'Hers adventures. Your own transport to help you getaway – away from the madding crowd.

White padded handlebar tape.	White padded handlebar tape.

Shimano Total Integration – STI for short – successfully integrates, for the first time, the bicycles steering, gear changing and braking functions.

In practice, it means that you can now gearshift and brake without moving the position of your hands on the bars. And it also means an overall increase in pedalling efficiency and energy savings.

To achieve this, Shimano have developed a unique combination of systems – SIS, SLR, RAPIDFIRE, HG, SG, BIOPACE and FREEHUB – each offering a significant advance in functionality and ergonomics.

SIS – Shimano Index Shifting – ensures positive, error-free gear changing, that requires no special practice and skill.

SLR – Shimano Linear Response – gives you cantilever braking power with reduced lever, cable and caliper friction, and sensitive 2-finger control.

RAPIDFIRE – is the lever system at the heart of STI performance. It's always under your thumb – one punch to shift down, one to shift up – while your grip stays firmly on the bars. You can even shift and brake simultaneously!

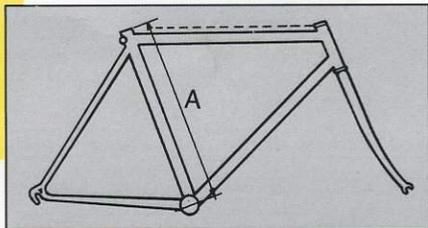

HG – stands for Hyperglide, the Shimano system that controls chain movement between sprockets, ensuring direct transfer with positive pick-up and release. Fast, clean high-torque shifts even when sprinting and climbing.

SG – is for Superglide, using the same technology as Hyperglide, providing two low-pressure chain release points for precise, smooth chainwheel shifting, without shock or hesitation even under heavy pedal loads.

BIOPACE – the computer designed non-round chainring that gives you a lighter, livelier pedalling cadence, matching your natural leg action.

FREEHUB – combines rear hub and freewheel mechanisms into a stronger one-piece unit, allowing precision Hyperglide sprocket indexing and more advantageous spoke flange placement.

Choosing the correct frame size
When it comes to choosing your bike, make sure you get the right size and type of model to suit you. To get the most pleasure from riding your bicycle we offer the following guide lines: As a general rule, allow 1" clearance between crotch and a straight top tube, and 2" for a sloping top tube when you are standing astride the bike in your stocking feet.

Straight top tube frame

Sloping top tube frame

MBK frame sizes are measured from the centre of the bottom bracket axle to the top of the seat tube (see 'A' on diagrams). For your safety and comfort, you need to ensure that the model you choose is the ideal size for you. Your MBK dealer is highly qualified to help you.

MBK CYCLES ARE MARKETED IN THE UK EXCLUSIVELY BY

MOORE LARGE & CO LTD

The policy of MBK Bicycles ensures continuous review and development of its products, and it reserves the right to alter components and specifications without notice. Please check with your dealer for the latest specifications.

MBK have appointed a Nationwide network of specialist dealers, chosen for their intimate knowledge of bicycles to give you the best possible after sales service. They are fully backed by Emmelle Bicycle Parts, the largest parts and accessories service in the UK, and your guarantee of satisfaction. All bicycles produced by MBK conform to BS6102.

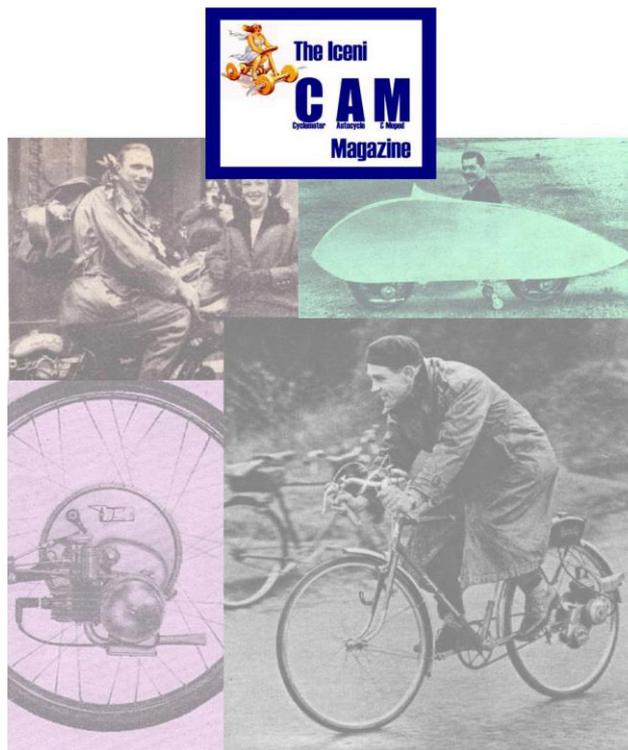

Guarantee

All MBK Bicycle Models featured in this Catalogue are fully guaranteed. Ask your dealer for details about periodical servicing.
