

NORMAN NIPPY PRODUCTION LINE IS IN FULL-SWING

*These pictures show the Ashford manufacturer's contribution
to current moped expansion*

BUILDING THE NORMAN NIPPY: These pictures, taken at the Ashford works of Norman Cycles, Ltd., are of some of the processes which go into the production of the Nippy moped. They are (top, left), welding the tank and main-frame pressings; (top, right), welding and final frame-welding section; (centre, left), exhaust pipe and handlebar bending section; (centre, right), moped wheel building section; (bottom, left), enamelling by the Ransburg electrostatic process; and (bottom, right), final assembly conveyor.
