

NORMAN *Nippy*
DE LUXE

SPARE PARTS
PRICE LIST

Price 2/-

This Spare Parts List covers Norman Nippy machines manufactured from November 1955 onwards.

It should be noted that slight improvements and modifications to this machine from time to time may call for a slightly different spare part from the original. Arrangements have, however, been made for any improved or modified part which may be supplied to be of standard fitting, that is to say it will be interchangeable with the old part.

When ordering bolts or nuts it is advisable for both bolt *and* nut to be specified, since some of the earlier models incorporated bolts and nuts having a metric thread and it has been our endeavour to standardise all English threads, so it will become apparent that if a nut and its bolt is supplied the recipient of the spare part will have two items which will mate.

Spare lists for the Sachs 50 engine fitted to the Norman Nippy are issued quite separately from this list which covers the cycle parts.

Norman Cycles Ltd.

Ashford, Kent.

(Nippy Spares and Servicing Dept.)

NORMAN *Nippy*
DE LUXE

SPARE PARTS

It is to the benefit of the customer to note the following points when ordering spare parts:—

Ask for genuine Norman spares always.

Give list number of part accurately.

Give a description of part required.

In case of doubt, send old part as pattern.

ALWAYS QUOTE:—

- 1. ENGINE NUMBER.**
- 2. FRAME NUMBER.**

Do please remember Service Departments are always very busy. You can help us to give good service by observing the points mentioned above.

SPARE OR REPLACEMENT PARTS ORDERS

All spares and replacement parts, including engine parts can be sent against receipt of remittance or under the Post Office C.O.D. system.

Business in connection with spare parts must always be treated on a Cash basis and sufficient should be included to cover the cost of postage. If this is not done, a surcharge of 5 per cent. to cover postage or carriage and packing will be charged (subject to a minimum of 6d.).

Unless otherwise instructed, all spare parts will be sent by C.O.D. post (weight permitting) when remittance does not accompany the order.

When making remittances by telegraph money order, the name and address of sender MUST be included in the space provided on the Post Office requisition form for a private message from remitter to payee; unless this is done the Post Office does not give this information upon a telegram.

When sending parts for replacement, repair, or as pattern, the name and address of the owner must always be securely attached and full instructions explaining what is required should be sent separately by post.

Old or worn parts sent as pattern are not returned unless specially asked for by the owner at the time of sending them to us.

In the event of correspondence relating to Spare Parts or Repairs, always quote our Invoice Number.

REPAIR SERVICE

Our Works at Ashford, Kent, are fully equipped and are available for the repair of engines or complete machines.

All work is attended to by specialists in repairs, and the work is carried out under the terms of our usual guarantee as given below.

We advise you to obtain your Spare Parts from your recognised Norman Dealer or direct from our Service Department, as there is no economy in fitting cheap imitation parts.

GUARANTEE

Any motor cycle, motor cycle combination or sidecar sent to us to be plated, enamelled or repaired will be repaired upon the following conditions, i.e., we guarantee that all precautions which are usual and reasonable have been taken by us to secure excellence of materials and workmanship, such guarantee to extend and be in force for 3 months only from the time such work shall have been executed, and this guarantee is in lieu and in exclusion of all conditions and warranties, statutory or otherwise, and all liabilities whatsoever, and the damages recoverable are limited to the cost of any further work which may be necessary to amend and make good the work found to be defective.

ESTIMATES

If required we are always prepared to give an estimate before proceeding with any repair. This entails a certain amount of labour in dismantling to ascertain what new parts will be required, and therefore, in the case of any estimate not being accepted for special reasons, a small charge is made for our mechanic's time in taking down the parts for report.

Estimates must be treated as APPROXIMATE only. We reserve the right to include additional parts should these be found, on further examination, to be necessary to make the repair satisfactory.

NOTE

The engine number of your engine is stamped on the left hand side of the crankcase. The frame number is stamped on the top of the seat tube just below the saddle. When ordering spare parts both these numbers should be clearly shown on your order thus minimising the risk of any error arising from the incorrect part being sent to you.

PORTUGUESE

O número do seu motor é estampado no costado esquerdo do cárter. O número do quadro é estampado no cano abaixo o selim. Ao pedir peças componentes é preciso mencionar os dois números para assegurar o despacho das peças correctas.

FRENCH

Le numéro de votre moteur est estampé sur le côté gauche du carter de transmission. Le numéro du cadre est estampé sur le tube au-dessous de la selle. Lors d'une commande de pièces détachées, prière de mentionner ces deux numéros pour assurer l'envoi des pièces justes.

GERMAN

Die Nummer Ihrer Maschine ist an der linken Seite der Ölwanne eingeschlagen. Die Fahrgestell Nummer ist am Rohrrahmen genau unter dem Sitz angebracht. Wenn Sie Ersatzteile bestellen, geben Sie bitte beide Nummern deutlich im Auftragschreiben an. Dadurch vermeiden Sie Irrtümer bei der Ausführung Ihres Auftrages.

DUTCH

Het nummer van uw motor is op de linkerkant van de carter gestempeld. Het chassisnummer staat gedrukt bovenop de buis net onder het zadel. Gelieve bij nabestelling van onderdelen deze beide nummers duidelijk op uw bestelformulier te vermelden, zodat zo weinig mogelijk risico op een vergissing gelopen wordt en U niet het verkeerde onderdeel ontvangt.

SPANISH

El número del motor es estampado en el costado izquierdo del carter. El número del cuadro es estampado en el tubo abajo el sillín. Cuando se piden piezas de recambio es preciso mencionar los dos números para asegurar el despacho de las piezas correctas.

SWEDISH

Motornumret på Er maskin är tryckt på vänstra sidan av axelboxen. Ramnumret är tryckt på sadelstängan tätt under sadeln. När Ni beställer reservdelar bör båda dessa nummer anges tydligt på Er order. Därigenom minskas risken för att fel reservdelar tillsänds Er.
