The sixty-first year of Queen Victoria's reign —when income tax was maintained at the "iniquitous" rate of eightpence in the pound—was the year in which "THE PATENT BUTTED TUBE COMPANY LTD." was incorporated, and it was under this name that we traded for twenty-five years. Not until 1923 did we change to the present style of "REYNOLDS TUBE COMPANY LTD." The change passed unnoticed by the world at large, for right from the very beginning our STEEL TUBES had been sold under the mark "REYNOLDS." Just as to-day, so, fifty years ago, people automatically thought of REYNOLDS when requiring high quality precision tubes or tubular formations.
