

versal range in various sizes finished in nickel, chromium, and black. There will be a higher grade quality known as the Superbe range, also shown in several sizes.

REYNOLDS TUBE CO., LTD. ... 128

THE centre of interest on Reynolds's own stand will be a complete range of tubing and tubular components for cycles in the well-known "531" alloy steel that was awarded the C.T.C. plaque in 1936. Besides the usual English patterns of forks and stays many of the Continental types will be shown, the name of Reynolds being held in high esteem amongst racing cyclists on the other side of the Channel. There will also be represented a display of the well-known Hiduminium R.R. 56 cycle handlebars, stems, seat pillars, and other small parts.
