INSTRUCTIONS FOR USE OF THE SPARE PARTS LIST

1. In the first place look up the respective sub-group in the List contents on page xx xy.

2. Look up the respective spare part or component in the illustration dealing with the respective subgroup.

3. In the text opposite the respective illustration look up the respective part No., name of the spare part and the respective notes.

4. The individual parts of a unit can be looked up in the respective illustration, on which an exploded view of the unit is given.

5. The indication "l. h. side", "r. h. side" are always to be understood in the driving direction. Indications as "first", "second", "front", "rear" are to be understood always from the front of the moped.

6. When ordering enamelled parts do not forget to mention colour of your machine.

Dear owner of the new MOPED STADION S 22

You have purchased a moped STADION, type S 22, which is a follower of above 150,000 mopeds produced of the type S 11, its predecessor.

As you may happen to know, the factory MOTOR-STADION is the oldest and largest producer of mopeds in the Czechoslovak Socialist Republic. The new type of mopeds Stadion, the owner of which you have become, have been put into series production only after the design has been tested by many prototypes in long and careful testing. The designers, technicians and workers have done their very best to manufacture for You a vehicle at a low price and cheap to operate, but with the maximum of riding comfort, outstanding longevity and least requirement of maintenance.

The producers of the moped STADION extend to you a six-months' guarantee, the same guarantee, that is offered by producers of much larger machines. Should any trouble arise, contact the nearest authorized repair shop, all of which are always fully stocked with original spare parts mark STADION. All the spare parts are made by their producer from quality materials and in the same way, using identic process as for those, used in the assembly of mopeds. It is therefore, only natural, that only the original spare parts faultless and economical operation of your moped can be ensured.

Important note: This Spare Parts List is not binding as far as the constructional execution of the moped is concerned or of its accessories. We are continually improving our products and have, therefore, to reserve ourselves the right of alterations as compared to the illustrations or descriptions given in the present Spare Parts List.
