# The "MANX T.T."

Produced  
by  
F. C. PARKES

**T**HE STRUTTED BRACKET which is incorporated in this model is an essential fitting when Deraillleur type gears are used. When a chain gear is fitted the two outer sprockets are running out of chain line and excessive whip on the back stays causes difficulty in changing gear.

When this SUN Strutted Bracket is fitted, however, the whip is reduced to an absolute minimum.

The most successful riders in the country have proved it.

You will have no difficulty with chain gears if you ride the Manx T.T. or insist on a cycle having the Sun Strutted Bracket with 73° head and 71° seat angles.

**PRICE £12.12.0 NETT**

- *I will build to any specification you wish.*  
*Delivery within 14/18 days.*
