This firm will exhibit a range of twelve machines built up of fittings of their own manufacture. One of their novelties for 1907 is the introduction of a cheaper grade machine, named the Solar; this has been introduced at their agents' special request to allow them to have a cheaper grade of machine to sell to the public. Their Standard Sun machine is considerably improved for 1907. Their Model Superbe, which met with such an encouraging demand during season 1906, has also been improved by giving extra value in the shape of a well fitted metal gear case. Nothing but the best of material is supplied in this machine, and agents can have every confidence in showing it to any of their clients, who are possessed of a heavy purse, and can afford to pay the extra that is charged for this machine. They are also exhibiting for the first time two juvenile cycles, samples of boy's and girl's; it is their intention to only supply a well-made juvenile machine. The monstrosities in the shape of cheap saddles and rattling brakes will be missing in these machines, as a good spring saddle is essential to the youthful riders of to-day. A full range of frames, fittings, free wheels, and hubs, etc., will be on exhibition in their office, No. 39, under the Gallery. The Sun Cycle Fittings Co. will welcome any of their old friends, and will be delighted to make appointments at different times to suit their convenience.

STAR CYCLE CO., LTD., WOLVERHAMPTON.

This firm will have on exhibition a Stuart car, 7-h.p. twin-

... the frames are built in four sizes, rising from 20in. to 26in. ...
... fittings are Crabbe brakes, micrometer free wheels, Perry chains, etc.
... everything neat, good, and stylish.

SUN CYCLE FITTINGS CO., LTD., ASTON BROOK
STREET, BIRMINGHAM. (160)

The firm are introducing a cheap line, to be known as the Solar, which is sold to the trade at four guineas for the gent.'s, and £4 10s. the ladies', with models fitted with Dunlop Cambridge tyres and the Sun free wheel. It is a serviceable line, and Sun agents, who have proved the good value of this firm's productions, will not hesitate to handle it. The Modele Superbe, for which we are aware there was a good sale during the past season, is improved in one or two details, the chief of which is the addition of the Speedwell metal gear-case. This is fitted with the Eadie two-speed coaster hub. The B28 saddle is lined in two colours, and at £7 represents exceedingly good value. Traders who are continually writing to the Editor of "The Trader" for informa-

... roller levers can be had
... and universally. An

tion about reliable juvenile machines, should make a note that this firm makes a speciality of this class of work, the boys' and girls' models exhibited here, fitted with the Sun free wheel, and selling at £4 and £4 10s. respectively being good specimens of reliable workmanship and efficiency—real value for money. The line in road racers, made up of their own special racing parts, and fitted with Dunlop sprint tyres and Brampton racing pedals and chains, scales at 22lb., and for road-racing purposes is worth keeping in mind. In their office—No. 39—the firm show their special lines in frames, fittings, brakes, etc., one or two points being worth noting, including an improvement in the well-known free wheel, which is now freer in the running.
