

SUZUKI B120

We, The Suzuki Family

*Black

For business, pleasure or whatever — Get around in style on a B120

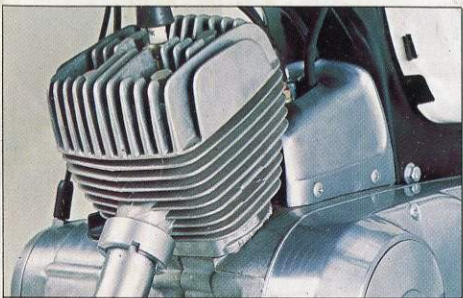

Built to the performance standard you need to get here, there, everywhere efficiently. And in style because of the new streamline design Suzuki has given the tank area. The high performance standard is set by the road-proven Suzuki 2-stroke engine, a tough

long-life frame that stays strength-reliable no matter how rough and tough the riding gets sometimes, and it's set by the large standard of smooth going that puts the quality of your ride in a class all its own.

SUZUKI B120

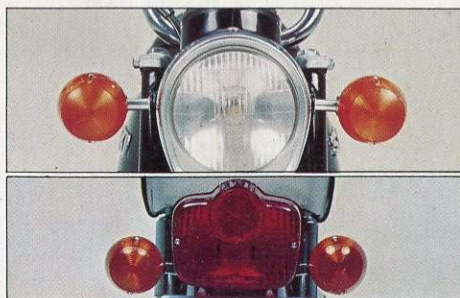

PEAK PERFORMANCE ENGINE

The power that gets you around comes from a smooth-running 2-stroke single cylinder engine and 4-speed constant mesh transmission. The engine is extra lightweight because it's made of strong aluminum alloy. It's extra dependable with Suzuki's unique CCI lubrication system. It starts fast in any gear because of primary kick starting. Then after starting it builds up power fast, 10HP at 7,000 rpm to get you where you're going efficiently.

TOUGH FRAME

The lightweight makes the B120 as easy to handle as a motorcycle in the 120cc class. Yet it's every bit as durable as the frame of larger bikes.

SAFETY FIRST

Headlamp, tail lamp, and turn signals are all oversize. This gives a big up-front beam at night for safe riding, insures that car drivers always know you're going to turn because signals are easy to see because of the size.

THE SMOOTH, RESPONSIVE RIDE

Smooth because of new oversize rear shock absorbers that have 3-position selective adjustment. Smooth, too, because of the ample measure of cushioned seating Suzuki gives you. Responsive, because of the sure-stop braking advantages and easy-to-see speedometer. No matter how you go or where you go...you can't go wrong on a B120.
