

THE SCOOTER

with POWER & PEDAL

Volume XII | No. 8 | July | 1964

This is Suzi

A new 50 c.c. two-wheeler, the "Suzi" is being added to the range of Suzuki lightweight motor cycles.

Suzi, which has a two-stroke single-cylinder engine, a kick starter, and fully automatic gear change, is a combination of a motor cycle and a moped—but pedals are not required—and it will be

known as a Mo-Kick.

Overall length is 69 in; seat height is 29 in; and it will be available in grey, red, blue or green.

Brakes are waterproof, and leg shields, dual seat, passenger footrests, driving mirrors and flashing indicators, are all included in the basic price of £93 9s. 0d. including purchase tax.

Suzi weighs only 123 lbs., has a fuel consumption of over 180 m.p.g., and a maximum speed of 43 m.p.h.
