The Pedal Power electric drive system is the perfect answer for commuting or shopping. As easy to use as an ordinary bicycle, costs only pence to run, and has a range of up to 25 miles on one charge of the battery at speeds of up to 15 MPH. The kit comes complete down to the last nut and bolt and can be fitted to any bike or trike by the average handiman in about 2-3 hours. The only controls are a handlebar lever and a push button control. With the motor fitted the bike or trike can still be used as a normal pedal machine, or used solely with the motor, or both for that extra power.

MODEL 50 - The ideal unit to make those every day cycle trips a pleasure . Single battery 12 volt system . Range approximately 20 miles . Speed 10 - 15 MPH . Climbs light gradients .

MODEL 100 - A more powerful version for the more hilly areas . Single battery 12 volt system . Range approx - imately 20 miles . Speed 10 - 15 MPH . Climbs moderate hills .

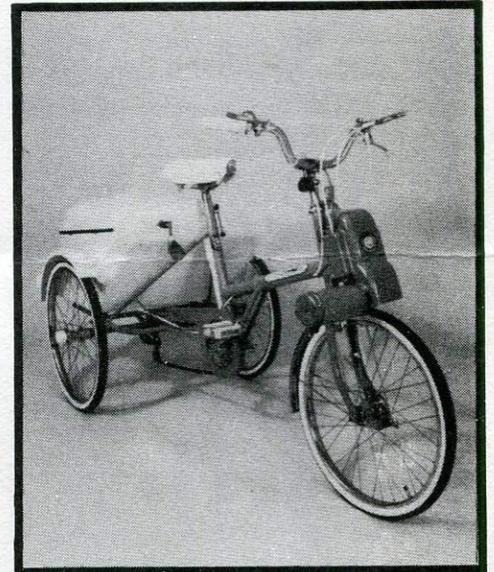

MODEL 150 - The most powerful version, ideal for everyday transport or for the elderly or disabled who find pedalling that much more difficult . Most suitable for tricycles . Twin battery 24 volt system . Range approx - imately 25 miles . Speed 10 - 15 miles . Climbs fairly steep hills .

ELECTROBIKE - The electric bike for people on the go, provides the lowest cost transportation for those around the town errands. Fully adjustable bike for all the family. Comes fully fitted with the 50, 100 or 150 motor and includes 3 speed gears, dynamo, lighting, prop stand and battery master switch.

Colours - Red or blue.

TRI-SHOPPER - The three wheeler designed to make shopping a pleasure and carry home those big loads with ease. Comes fully fitted with the 50, 100 or 150 motors and includes 3 speed gears, parking brake, bell and battery master switch. Colours - Red, blue or green

BATTERY CHARGERS - These are not included in the price of the above, as some of our customers already have them . However we would recommend the use of one of our own high quality thyristor controlled chargers These are designed to automatically switch off when the battery is fully charged, thus prolonging battery life, and will charge the battery to its maximum, giving you more miles per charge .

REGULATIONS - Under the " Electrically Assisted Pedal Cycle Regulations 1982 " Pedal Power electrically driven vehicles are exempt from driving licence, insurance, road fund licence, MOT and wearing of crash helmet. Age limit is 14 years upwards .

Bikes, Trikes and Kits have 12 months guarantee. Mileage figures obtained using thyristor battery chargers.

TRI-SHOPPER ELECTRIC

The latest machine from TGA representing many years of development with electrically driven vehicles.

The ultimate in three wheeled transport combining good looks, noiseless and pollution free operation and finger tip control, to make it the perfect answer for commuting or shopping.

Costing only pence to run and being very simple to use makes it appealing and convenient for all age groups with a special appeal for the partially disabled, by giving the freedom and independence needed without resembling conventional invalid vehicles.

The Tri-Shopper Electric is as easy to ride as an ordinary tricycle, and indeed with the electrics off can be used as one, and of course unlike other electric vehicles you will never be stranded because you can always pedal home. Operating the motor is simplicity itself, no gears or clutch to worry about, just switch on, turn the twistgrip and away you go.

The tricycle is powered by two 12 volt batteries driving a 24 volt motor through a reduction gearbox via a chain to the rear axle. The speed is completely variable up to its legal maximum of 15 MPH and controlled by a twistgrip via an electronic controller. The mechanics are compacted into the rear boot and fitted with a cover, still leaving considerable room for shopping. The tricycle will run purely on battery power for up to 18 miles, depending on terrain, and with assistance from the pedals will cover a much greater distance. It can then be recharged overnight and be ready for the same thing again the next day. Fairly steep hills can be climbed under its own power, and even the steepest of hills can be tackled with assistance from the pedals.

GENERAL SPECIFICATION.

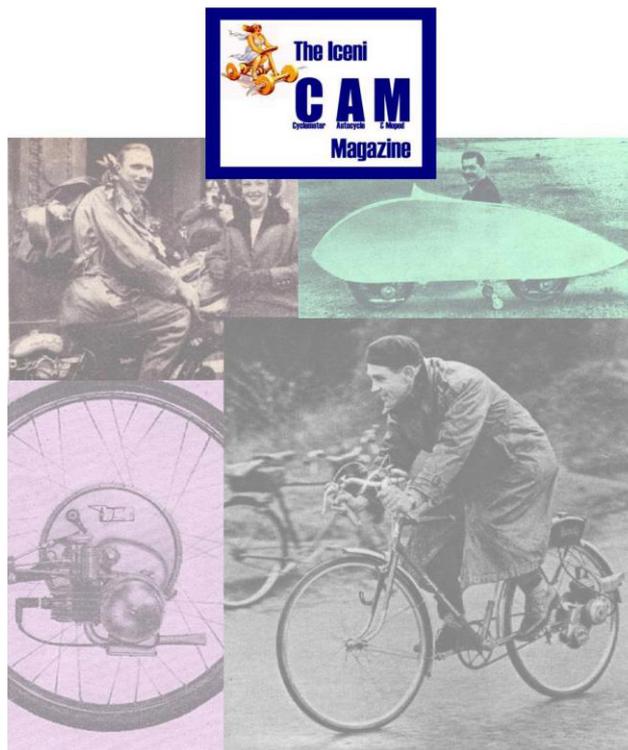

WHEELS	— 20 x 1 ³ / ₈ front, 20 x 1.75 rear.
BRAKES	— Front hub and caliper plus parking brake.
GEARS	— Huret sensomatic three speed derailleur system.
MOTOR	— 24 volt 250 watt continuous rated output.
BATTERIES	— Two 12 volt 40 amp/hour with battery condition indicator and master switch with removable key.
FRAMEWORK	— Enamelled in red, metallic blue or metallic green.
BODYWORK	— High quality fibreglass, self coloured in white, waterproof and lockable.
OVERALL LENGTH	— 5'6".
OVERALL WIDTH	— 2'6".
GUARANTEE	— Twelve months.
EXTRAS	— 24 volt Battery charger, Lights, Indicators, Electric Horn, Front Basket and Carrier, Speedometer or Mileometer, Chrome Rear View Mirror, Vynyl Weather Cover, Windscreen.

BATTERY CHARGERS - These are not included in the price of the above, as some of our customers already have them. However, we would recommend the use of one of our own high quality thyristor controlled chargers. These are designed to automatically switch off when the battery is fully charged, thus prolonging battery life, and will charge the battery to its maximum, giving you more miles per charge.

REGULATIONS - Under the "Electrically Assisted Pedal Cycle Regulations 1982" Riders Of The Tri Shopper Electric are exempt from driving licence, insurance, road fund licence, MOT and wearing of crash helmet. Age limit is 14 years upwards.
