

# Winn City Bike

**all electric  
no noise  
no fumes**

No wonder this "City Bike" has caused such a sensation! It could, together with the Winn City Car, transform traffic (and living) conditions in our towns and cities.

This all-electric two-wheeler is quite surprisingly robust and compact (only 42" x 9½" x 30" including fully extended handlebars). No noise, fumes, starting troubles, petrol, gears or maintenance—simply switch on and drive off! And what acceleration! This machine is a real bundle of energy! Its amazing size and performance make it ideal for use in city traffic conditions—and for parking (take it up in the lift with you!). It will travel up to twenty miles on one charge, which is quite a distance by city standards, and for a cost of less than 2d. To recharge, just plug into the mains overnight! It has a top speed of up to 30 m.p.h.—quite exhilarating!

This bike has to be seen to be believed, so try one!

### Some suggestions on uses

General use in cities, simple parking and easy progress through congested traffic conditions. Ideal for commuters and messengers, and quick economical transport for executives and personnel where other transport is impracticable. Airport and race track officials will find the Winn City Bike particularly useful, and there are sidecar and carrier versions available for newspaper roundsmen and delivery men. Gas and electricity meter readers and anyone who would normally use a pedal cycle will find this bike indispensable.

**it's electric  
it's a winner**

### Specification

- Measurements:** Body and wheels 42" x 9½" x 20". Handlebar extension 10".
- Weight:** 140 lbs. (all inclusive).
- Top speed:** Up to 30 m.p.h. on the level with a 16 stone rider.
- Charging details:** Fully charged overnight—just plug into mains. Unique fully-automatic charge system ensures maximum efficiency and extended battery life.
- Battery capacity:** 1.2 KWH—10 to 20 miles.
- Costs of full charge:** Less than 2d.
- Powerful drum brakes on front and rear wheels.
- Twistgrip acceleration control.
- Full "after dark" lights (tail and head).
- Removeable "ignition" key.
- Stand and footrest combined.
- Standard interchangeable parts to facilitate after-sales service.
- Plastic monocoque totally enclosed body—rust and corrosion free—moulded-in colour.
- As we are continually improving the model we reserve the right to modify the specification.

## Operating instructions

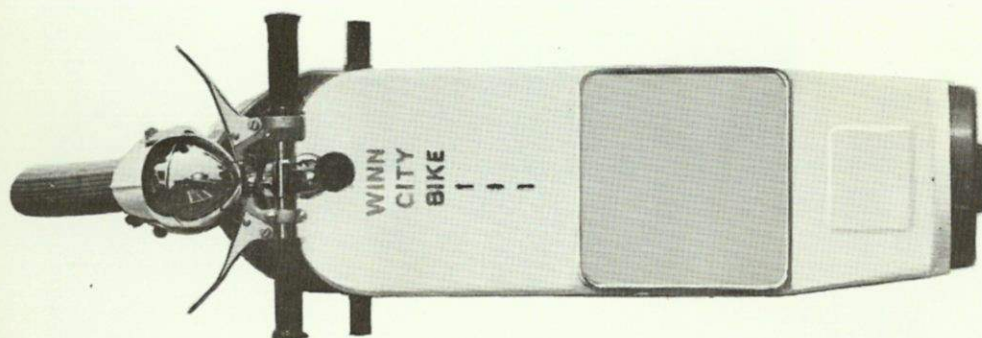

### To drive:

- 1 Insert "ignition" key and switch on. Lift stand.
- 2 Turn right handlebar twistgrip gently and accelerate away. Twist further for more speed.
- 3 Operate brakes as on a pedal cycle.

### To recharge:

- 1 Switch "ignition" key to charge position (and remove it if you wish).
- 2 It is always advisable to recharge whenever the bike is not in use. If this is done you will find your bike virtually tireless. AC mains only.

plug in to recharge
